A Simple Project

Introducing DogeElon Inu, a cryptocurrency that fully embraces the spirit of decentralization.

DogeElon Inu was conceived in 2022 as an amusing name that pokes fun at the abundance of meme coins and memes of memes in circulation. It has since taken on the form of a real token with the ticker symbol DEITY. There's no owner, no management, and liquidity in its initial trading pair on Uniswap is forever locked. The project has been deployed with a supply of 1,000,000,000 tokens and that's it.

DogeElon Inu can function as a circulating currency, a store of value, or in any way the public sees fit. That's right. DogeElon Inu isn't community-driven, it's publicly traded. And with its basic nature, it is primed for many future-use cases. Most importantly, it functions as an example.

** The DogeElon Inu token is not affiliated with Dogecoin, Elon Musk or Shiba Inu.*

Token Naming

DogeElon Inu is a combination of “Dogecoin”, “Elon Musk” and “Shiba Inu”.

The divinely inspired ticker symbol DEITY works as follows: D for “Dogecoin”, E for “Elon” and I for “Inu”. That’s DEI *to you*.

“DEITY” also captures the spirit of the holy trinity of meme coins in its day.
